Guidelines for Barytes on Footpaths

Council

The Flinders Ranges Council will supply and deliver barytes free of charge to residents, on request, for residents to spread on the footpath outside their premise.

***Note:** Delivery of material will have to fit in with Council’s works program, and there may be a delay of several weeks before the barytes can be delivered.*

Resident

- Spread the material as soon as possible to avoid obstacles on the footpaths
- Keep the footpath safe at all times
- Material to be spread to a maximum of 25mm, (1inch) deep. Hollows and dips to be filled with a suitable material before spreading barytes. (Council can supply material if requested)
- Loose barytes to be wet down and tamped to harden the surface.

Works Manager

The Flinders Ranges Council.
